Creating breathing space above the city with a contemporary decked terrace

Client:
Workspace Group

Project Location:
Phipp St, Shoreditch, London

Design:
Squire & Partners

Construction:
HG Construction/
Noble House Services

The Frames, Shoreditch, consists of 68 trendy offices and studios, characterised by high ceilings and whitewashed walls and bathed in natural light. The building is situated to the north of the City of London and is surrounded by quirky coffee houses, pop-up shops, restaurants and bars. Millboard's Enhanced Grain boards in Charred Oak were installed to create a smart outdoor breakaway space that highlights the building's grand curves, complete with an enduring walkway around the perimeter.

Smart looks

Burnt Cedar provides a modern but natural and relaxing aesthetic

Safe to use

Millboard decking resists algal growth and rot, and is safe to walk on, even in the wet

Low maintenance

A simple wipe over with soapy water every now and then is all the cleaning it needs

Every length of Millboard decking is finished by hand, facilitating natural tone variation. The true-to-life shades that result speak for themselves.
