

Cassette awning

Semina Life

Semina Life LED | Valance Plus | LED Valance Plus

Semina Life is the all-rounder among cassette-awnings. It impresses due to its modern, fresh design combined with weinor's technology tried and tested over many years. As it is such superb value for money the **Semina Life** is a real alternative to the semi-cassette. Its many technical highlights provide superb comfort and a long operating life. Whether young or old, modern or traditional: **Semina Life** is always just the right choice – in a class of its own!

Modern design covers:

The stainless steel look headplate rings can be combined with the required frame colour

Integrated rain gutter:
Water drain

Stable, elegant brackets:

With easy access to adjust the inclination

Wall
mounting

Ceiling
mounting

Rafter mounting

Semina Life LED (optional):
Integrated lighting

Semina Life Highlights

01

Valance Plus option:

Vertical privacy and sun protection

Both the awning and Valance Plus are available either with gear drive or motor drive.

weinor LongLife arm:

Very durable and low-noise

Semina Life Benefits

Cassette-awning – youthful design with state-of-the-art technology

The Semina Life cassette is chic and offers protection against the weather.

- Innovative closing of the awning causing practically no wear at all thanks to the cushioned infeed rollers
- Beautifully shaped stainless steel look aluminium headplate rings

Semina Life LED – cassette with integrated LED lighting

The LED spotlights integrated into the cassette produce atmospheric lighting on the patio.

- 30,000 LED light hours with lowest energy consumption (85% electricity saving compared to halogen technology)
- LED infinitely dimmable using weinor's BiConnect control

Valance Plus – vertical privacy and sun protection

The Valance Plus is elegantly integrated into the awning's drop profile. It provides privacy and glare protection even with a low-lying sun.

- Continuously extendable up to 210 cm
- Patented weinor OptiFlow-System® to keep fabric ideally positioned and to close the drop profile safely

Two-part bracket cover – simple angle of pitch adjustment

The lower part of the beautifully shaped cover can be easily removed. As a result there is very easy access to the screws for the angle of pitch adjustment. The pitch in the brackets is preset at the factory for easy installation.

Semina Life LED

LED lighting – 30,000 hours of lighting with lowest energy consumption

Select LED components for top weinor quality:

- Atmospheric light thanks to special glass lenses
- Visually integrated into the cassette
- Lighting remains on even when awning is retracted
- Highly energy-efficient
- Operating life of 30,000 hours
- Infinitely dimmable when used with BiConnect radio control
- Easy to service: simply replace individual LED lights without dismounting the awning

Integrated LED lighting

Semina Life Valance Plus

More privacy thanks to vertical privacy and sun screen (optional)

The gear-operated or motorised vertical awning is elegantly integrated into the awning's front profile.

- Glare protection and privacy shield up to a maximum valance height of 210 cm
- Extends to any length
- Use Valance Plus with an awning angle of pitch between 10° and 20°
- Valance Plus cannot be retrofitted
- Valance Plus with motor only with motorised awning

– Not available

* Max. roll widths are stipulated in the collection brochure

Please note: On the gear-driven Valance Plus, it is possible that the Valance Plus bottom rail will close unevenly.

Semina Life Controls

The receiver, power supply pack and other electrical components, such as the BiConnect receiver are integrated into the cassette

The faceplate can be easily opened for servicing purposes.

The receiver, which is separate from the drive, is then easily accessible.

Exclusive retraction protection

- Co-ordinated retraction: first the Valance Plus, then the awning
- To make sure nothing gets knocked over on the terrace

Note:

Please see the "Accessories" technical brochure for further details regarding the drive and control.

Some options are subject to a surcharge. For prices, please refer to the weinor awnings price list.

Gear drive (optional)

The Semina Life can of course be extended and retracted using a gear handle too (with a max. projection of 350 cm). This option is recommended whenever it is hard to connect to an electrical power source on the site or if the awning is not frequently used.

- The Semina Life has a universal bevel gear system.
- End stop adjustable from outside
- Tested according to DIN EN 14203
- Freewheel device when extended

Gear drive installation options based on the awning's type of installation

Standard gear outlet with wall mounting

Gear drive installation options based on the awning's type of installation

Gear outlet with ceiling/balcony installation

Tempura heating system (optional)

The perfect combination: Semina Life with Tempura heating system, Valance Plus and BiConnect*:

- Automated retraction with BiConnect: first the Valance Plus, then the awning
- As a result, the Valance Plus is protected from the material being damaged due to overheating by the Tempura heating system

Please note:

The Tempura's angle of pitch is restricted to 15° as standard. (This restriction is to avoid the wall being heated up too much by the Tempura.) The grub screw, which restricts the angle of pitch, can be removed if the Semina Life is adjusted up to 10° at the most. Then it is possible to adjust the Tempura's angle of pitch up to 30°.

* The heating may not be attached to awnings with Valance Plus. Unless a control is used which ensures that the awning is always extended first and then the Valance Plus and that the Valance Plus is always retracted first before the awning. In this way safety clearances are always adhered to.

Semina Life Roller support

Semina Life: wall mounting with centre bracket and roller support

- From a width of 551 cm or more, a roller support and centre bracket is used in the middle
- The sliding support bearing is preassembled and can be adjusted to the size of the fabric roll accordingly
- Support of load against the wall or roof by means of simple screw fastening

- ❶ Centre bracket (wall bracket)
- ❷ Cassette
- ❸ Fabric roller bearing
- ❹ Fabric rolls
- ❺ Roller support
- ❻ Sliding support bearing

Semina Life Planning

Site measurements – determining the projection and head clearance height

- Find the projection by looking in the “Projection” table for the terrace depth.
- Using the projection from the table and the required angle of inclination, consult the “head clearance height” table for the head clearance height. This head clearance height refers to an installation height of 300 cm.
- Add/subtract the difference between 300 cm and the actual installation height to/from the head clearance height in the table.

Determining the projection

Angle of pitch	Terrace depth in cm					
	150	200	250	300	350	400
5°	151	201	251	301	351	400
15°	155	207	259	311	362	400
25°	166	221	276	331	386	400

Projection in cm (rounded figures)

This table can be used to find the awning projection for any given horizontal patio depth.

Determining the head clearance height

Angle of pitch	Projection in cm					
	150	200	250	300	350	400
5°	276	272	267	263	258	254
15°	250	237	224	211	198	185
25°	226	204	183	162	141	120

Head clearance height in cm (rounded figures)

This table is used to find the head clearance heights for various projections when the angle of inclination is 5°, 15° or 25°.

This table is based on the example of an installation height of 300 cm (upper edge of awning).

	Producible
	Limiting size (width)
	Not producible
	Not producible

Deduction dimension X* = 42 cm
 * Min. width = projection + deduction dimension X

Explanation

Producible: 202 cm width of awning and 160 cm projection

Not producible: 201 cm width of awning and 160 cm projection

- The limiting widths shown refer to Semina Life with 250 brackets without BiConnect Agido.
- When using the BiConnect Agido the required width is increased by 14 cm.
- When using 430 brackets the required width increases by 18 cm.
- The combination of BiConnect Agido and 430 brackets increases the required width of awning by 32 cm.
- Dimension limits do not apply to Semina Life LED. Our employees at the Customer Center will be happy to check these on request.

Caution! With awnings with dimensions within the limiting size range it is not permissible to slide the brackets by the standard ± 100 mm. The permissible sliding range is indicated on the confirmation of the order.

Extraction forces

The extraction force is the force with which the weight of the awning and the wind load pull on each upper fixing. The tables indicate this force in N per upper fixing. It varies depending on the awning size and the wall bracket/mounting plate used.

Selecting the wall bracket and anchoring system:

1. Consult relevant table for extraction force per fixing for selected awning size.
2. Select a wall bracket/mounting plate for which there is fixing material which can resist the indicated extraction force. Remember to take into account the spacing, the area which will be damaged if the fixing breaks out, the type of fixing material used and the mounting base.

See separate bracket overview for other bases.

	1 standard wall bracket (250 mm) per awning arm, 1 centre bracket (250 mm) with width of 551 cm or more Number of fixing materials: without a centre bracket 8* in total with a centre bracket 12* in total
